TEL.:+81-54-634-1000 FAX:+81-54-634-1010

The result of the examination is reported as mentioned in the following.

## 1. Sample Information

Sample name	2017 production Green tea
Sampling date	December 7, 2017
Sampled by	Wataru Nakamura
Date Sample Received	December 7, 2017

## 2. Measuring method

Nuclide analysis method by gamma spectrometry with germanium semiconductor detector

"Radioactive caesium in the food inspection method(2012)" Ministry of Health, Labour and Welfare( Japan )

## 3. Result

Item	Result	Detection limit
Radioactive Iodine(I-131)	N.D.	3.1Bq/kg
Radioactive Caesium(Cs-134)	N.D.	2.4Bq/kg
Radioactive Caesium(Cs-137)	N.D.	2.6Bq/kg

Note: Measured Date : December 8,2017

Germanium Detector Model : CANBERRA GC4020\_DSA-1000(MCA)

"N.D.(Not Detected)"in the result means that the measured value is under the method of detection limit.
